Figure 1 is a line graph showing Normalized Voltage (Y-axis, ranging from 0.003 to 0.011) versus Position [mm] (X-axis, ranging from 26 to 31). The graph displays three measurements and their corresponding fits:

- Measurement_0 (Blue line with circles)
- Measurement_0_Fit: -0.00161 V/mmV (Orange line with circles)
- Measurement_1 (Green line with circles)
- Measurement_1_Fit: -0.00159 V/mmV (Red line with circles)
- Measurement_2 (Purple line with circles)
- Measurement_2_Fit: -0.00159 V/mmV (Brown line with circles)

The data points for the measurements are approximately as follows:

Position [mm]	Measurement_0	Measurement_1	Measurement_2
26	0.0110	0.0108	0.0107
26.5	0.0102	0.0102	0.0102
27	0.0094	0.0094	0.0094
27.5	0.0086	0.0086	0.0086
28	0.0078	0.0078	0.0078
28.5	0.0070	0.0070	0.0070
